DETAILED ACTION

Allowable Subject Matter

Claims 1-6 allowed.

The following is an examiner's statement of reasons for allowance: There is no prior art of record that teaches an arrangement for simultaneous generation of a positive image and a negative image in digital projection comprising: a light source, polarizing optics for delivering linearly polarized light flow, at least one polarizing beam splitter; and an LCD panel for modulating the light flow comprising polarization optics and a reflecting LCD panel being arranged following the said light source and in the beam path; and two polarizing beam splitters having a Faraday rotator arranged therebetween being further arranged in the front of the reflecting LCD panel.

Prior art, Stoll US Patent 6418106, does teach a holographic memory device comprising a light source (cover figure 101), polarizing optics for delivering a linearly polarized light flow, at least one polarizing beam splitter(cover figure 134 / 136 , 110) and a CCD panel being arranged following the light source and in the beam path, and two polarizing beam splitters having a liquid crystal polarization rotator (cover figure 118)between. Stoll discloses a polarized laser as a light source therefore polarization optics is not necessary. Stoll does not teach using a Faraday rotator nor does Stoll teach a reflective liquid crystal display panel in the light path.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
